

Hello, I'm Abdulrhman Badwy a Software Engineer

A Computer Science student passionate about mobile app development and problem solving.

I enjoy building clean, scalable applications using Flutter and continuously improving my skills in data structures and algorithms.

About Me

My journey in technology started with a simple curiosity – how do applications really work?

That curiosity led me to study Computer Science and dive deep into programming. Step by step, I completed the first seven courses from Abu Hadhoud's track, building a solid foundation in programming fundamentals, problem solving, and clean code principles.

I later specialized in Flutter development and strengthened my skills in Data Structures and Algorithms. As a member of IEEE and GDG, I continue learning, building, and growing as a software engineer.

MY EXPERTISE

Software Development Engineer

Mobile App Development

I build cross-platform mobile applications using Flutter, focusing on clean architecture, performance, and responsive UI design.

Community & Continuous Learning

Active member of IEEE & GDG, continuously improving technical and teamwork skills.

Problem Solving

Applying data structures and algorithms to create efficient solutions.

Food Delivery App

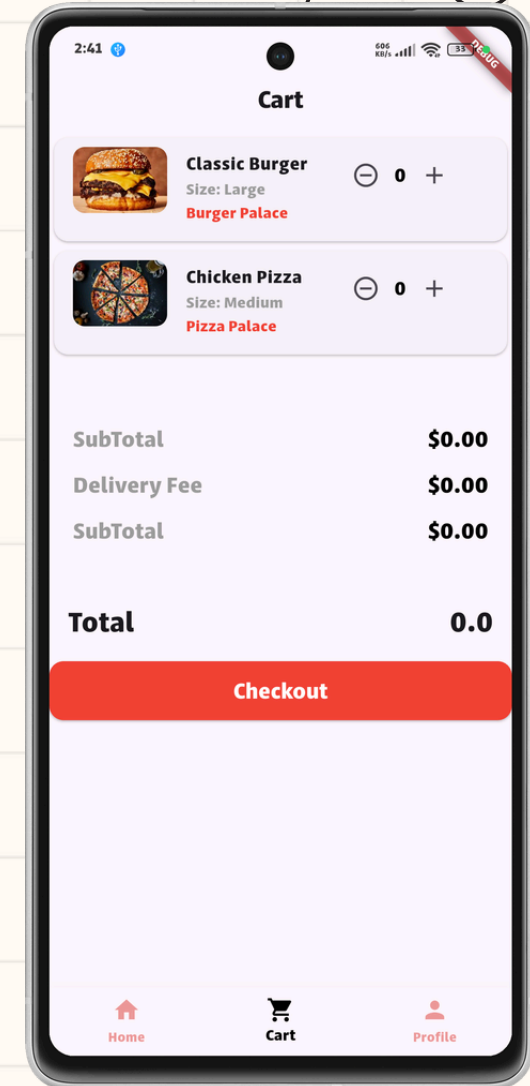

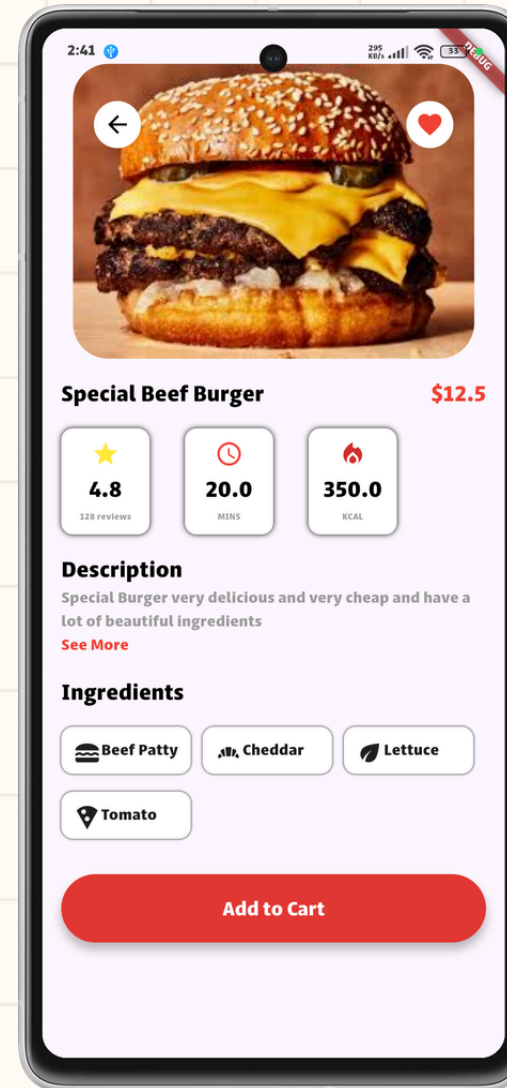

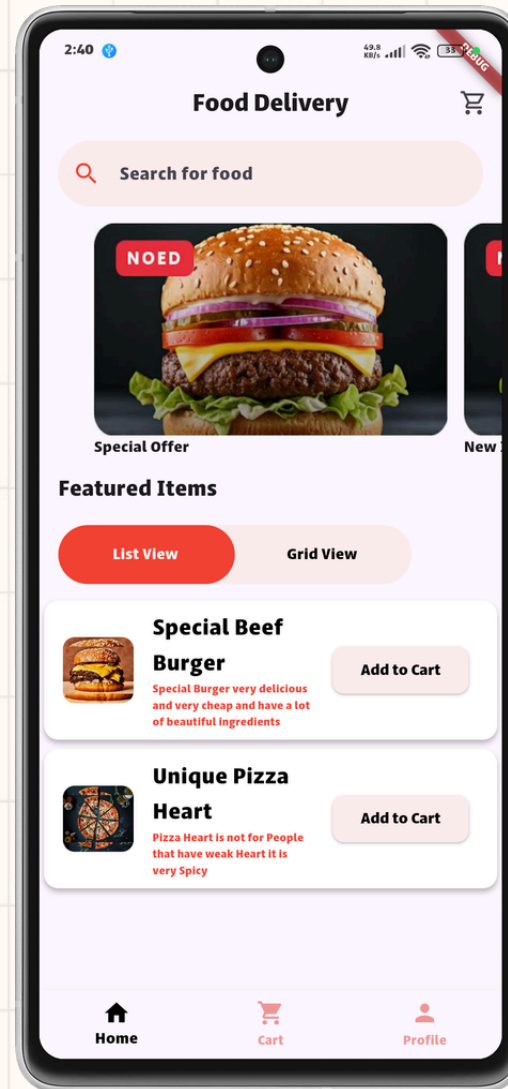

The Food Delivery app provides a fast and convenient way to order food using a mobile device.

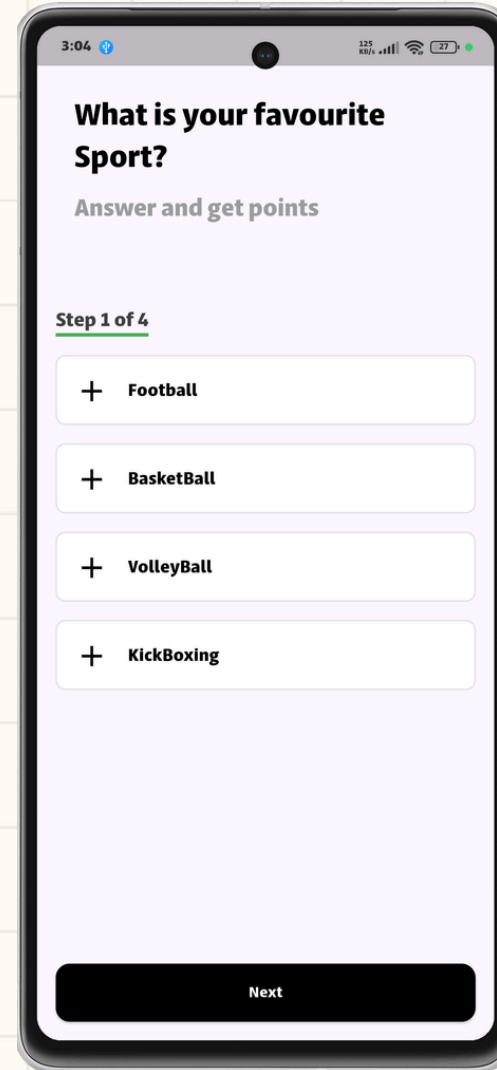

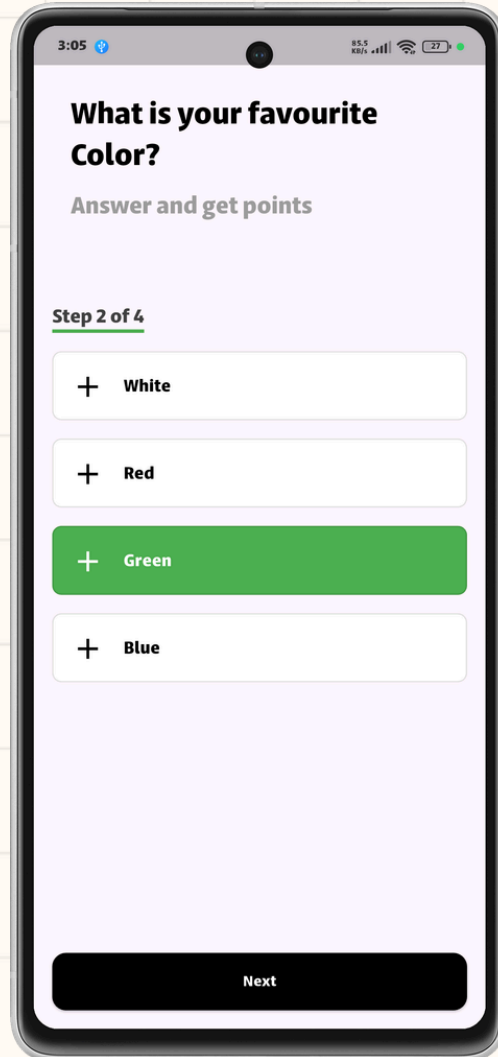

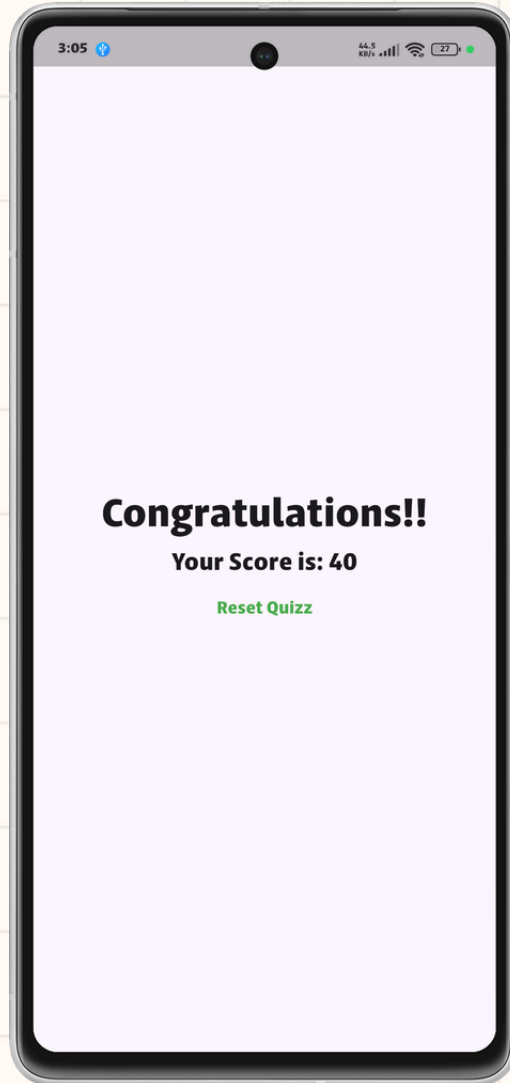

Users can browse meals in list or grid views with a featured offers slider.

Each item includes detailed information such as price, rating, and ingredients.

The app allows users to easily add items to the shopping cart and manage quantities.

It features a clean, modern interface designed for a smooth and user-friendly experience. 🍔📱

Quizz App

The Simple Quiz App allows users to answer multiple-choice questions in an interactive way.

Each question is displayed clearly with several options to choose from. Users select their answers and move through the quiz step by step.

At the end of the quiz, the app calculates and displays the total score.

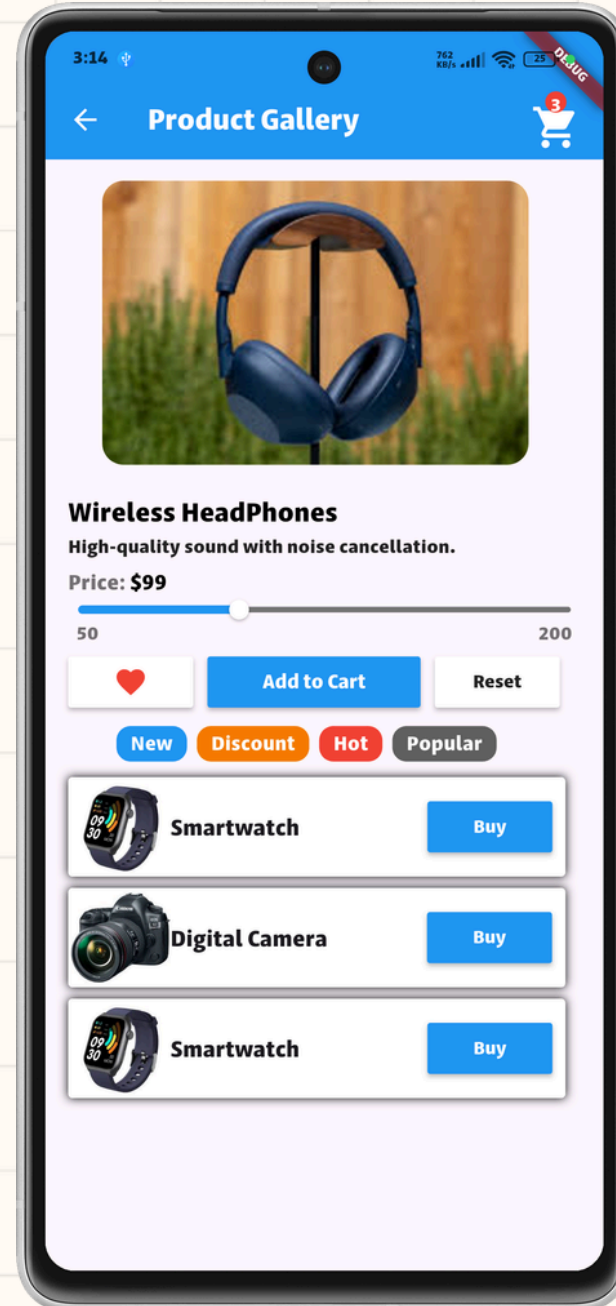

The app features a simple and user-friendly design for an easy quiz experience. 🎯📱

Product Gallery

This application is a simple and user-friendly shopping app. It displays products with images, prices, and brief descriptions. Users can adjust the quantity and add items to the cart easily.

The app includes product categories and popular item suggestions.

It provides a smooth and clean UI for a better shopping experience.
