

1- All Price Client

- **Case:** When we start the call he said another one make Application with Less Price than you , why you take this Price ?
 - **Response:** I will demonstrate What I will give you with the Application and the Quality that I will give him and the Professional App I will make and there is the support after I finish the App , finally I will demonstrate why I will take this price . Quality == Price
-
- **Case:** When he replay to me "I don't care about these things. I just want the cheapest price."
 - **Response:** I will say : as you like but in the finish we will regret because the price isn't all of thing and I'm at your service anytime if you want me to do it at a price that suits me.
-

2- I know it all Client

- **Case:** this client is want an application and he said " I Understand the Programming and the application is Simple and Don't take a lot of time , why you take this time "

- **Response:** I explain to him the programming isn't a simple ,if he was a simple you don't come to me and you will make that with you self and ,I will demonstrate the process that we will make to do the Application

- **Case:** when he said : "No, no, the code isn't working correctly, I was sure of it."
- **Response:** I will ask him where is the problem and if actually is a problem I will apologize from him and I will fix it immediately and if not a problem I will demonstrate the situation and why I use this .
