

DEPI Assignment 2

Create a program that lets users track daily expenses.

The program should:

1. Add expenses (description, amount, category and date)
 - Takes user input for description, amount, and category.
 - Validates inputs (e.g., non-negative amounts).
 - Adds the expense to the list.
2. View all expenses
 - Prints all expenses
 - Handles empty lists.

Extra Task (optional):

3. Add filtering by category
 - Ask the user for a category
 - Print only expenses in that category.
4. Calculate some statistics
 - Total spending.
 - Average expense amount.
 - Highest expense.

Example Output

```
=== Expense Tracker ===
1. Add Expense
2. View All Expenses
3. Exit
Enter your choice (1-3):
```

```
Enter description: Groceries
Enter amount: 45.50
Select category (1-4):
1. Food
2. Transportation
3. Entertainment
4. Other
✅ Expense added!
```
